

Internship Confirmation — Guide for State Directorate

This page lets the State office view internship confirmation data submitted by all colleges, and download it in the government report format. Follow the steps below — no technical knowledge needed.

1 Login

1. Open <https://placeintern.com> in your browser.
2. Enter your State Directorate email/username and password.
3. Click Login.

2 Go to the Internship Confirmation page

1. On the left-side menu, click "Internship Confirmation".
2. This shows a read-only list of internship records from all colleges. You cannot add, edit, or delete here — only colleges do that.

3 Filter the list (optional)

1. Use the filters at the top of the page to narrow the list down.
2. You can filter by district, or by a specific college/institution.

4 Export for government submission

1. Click the "Export" button.
2. An Excel file downloads in the exact government report format, with all columns already filled in from what colleges have submitted.
3. Use this file for your TPO/DTE submission.

Good to know

- You can view and export records from every college — but not add, edit, or delete anything.
- The export always reflects the latest data colleges have submitted at the time you click Export.
- This data is separate from a student's main internship record — it is only used for the periodic government confirmation/report.
